Forough Armanpour

UX Designer & Researcher | Data-Driven Design | Roadmap Prioritization | Digital Marketing Specialist

Portfolio: armanpourf.wixsite.com/portfolio | Mobile: +31 653124962 | Email: armanpour.f@gmail.com

Ik werk in het Engels en leer actief Nederlands (niveau B1).

I'm a UX/UI Designer and UX Researcher with 5+ years of experience helping startups turn ideas into user-centered web and mobile products. I've worked across Health & Fitness, Social & Lifestyle and EdTech, and contributed to retail website redesigns.
I combine user research, usability testing and accessibility design with a digital marketing background in analytics and conversion optimization. These insights help me plan stronger interviews, A/B tests, and usability studies, and turn them into intuitive, user-centered designs that support business goals. I also use AI-assisted tools to find usability issues and suggest fixes faster.

I'm ready for my next step as a Product Owner, Product Manager or Project/Program Manager.

CORE STRENGTHS

- **User Experience Design:** UX research, usability testing, information architecture, wireframing, prototyping, product discovery, roadmap input, product requirements, customer journey mapping.
- **Product Discovery:** Roadmap input, product requirements, prioritization, competitor and market research.
- **AI-Assisted UX/UI Quality Improvement**: Use generative AI and LLM tools to draft survey and interview questions, speed up design validation and find usability issues.
- **Startup Collaboration:** Cross-functional coordination, distributed teams, prioritization, agile delivery support.
- **Accessibility & Inclusive Design:** Digital accessibility, accessible interaction patterns, color-independent design, inclusive user journeys, accessibility-focused reviews.
- **Digital Marketing & Content:** SEO/SEM, Google Analytics, conversion optimization, email marketing, copywriting, social media content.
- **Platforms:** Web, Android and iOS mobile applications.

PROFESSIONAL EXPERIENCE

UX Designer & Researcher | **Brezaa** - **EliteKoach** | April 2021 - Present

Joined products at early stages and helped shape the concept, UX strategy and product direction through to launch.

- Partner with the CEO to translate product vision into user journeys, pitch deck narratives and clear product priorities.
- Led usability studies that contributed to two new features and a redesigned application.
- Researched the market and analyzed 4 competitors through feature comparison and UX audits, identifying gaps that shaped feature priorities and product positioning.
- Conducted 15 user interviews and used AI to draft and refine survey questions and reviewing the output.
- Combined quantitative data (analytics, A/B tests) with qualitative research (interviews, usability tests) to guide design and roadmap decisions.
- Improved onboarding completion and homepage visits by 7% through A/B testing and user experience optimization.
- Improved accessibility by 3% by making designs color independent and checking them against WCAG with Lighthouse.
- Designed wireframes and prototypes for web and mobile apps and handed them over to developers with clear specs and user flows.
- Built AI-assisted UI testing tool with GitHub Copilot Agent in VS Code to test the website end-to-end, report usability issues, suggest how to fix them, and recommend improvements to the overall website UI.

UX/UI Designer | **Freelance Projects** | August 2020 - March 2021

- Recruited participants, conducted interviews and used affinity mapping to group findings into key themes.
- Developed personas and prioritized user groups to align research findings with product roadmap needs.
- Led usability studies that contributed to three new features and a redesigned application.
- Increased user engagement by 6% after improving navigation through card sorting techniques.
- Created interactive prototypes for user feedback before development and used usability test insights to improve product flows.

Digital Marketer | **Sorooshsima Advertising Agency** | April 2017 - October 2018

- Improved homepage conversion rate by 14% through Google Analytics insights and A/B tests on landing and payment pages.
- Used Hotjar heatmaps and session recordings to study user behavior and translated behavioral insights into content.
- Supported Google Ads campaigns and optimized web and social content to bring in more qualified visitors.
- Designed newsletter templates and ran email campaigns in Mailchimp for lists of approx. 1,000+ subscribers.
- Reached out to partner websites and arranged ad placements for clients.

Marketing Copywriter | **TENA** | August 2015 - September 2016

- Wrote marketing copy and customer-facing content, developing strong messaging, storytelling, and brand communication skills relevant to UX writing, product communication, and digital campaigns.
- Worked with the campaign and content teams to align user-facing language with business goals and customer expectations.
